

Press Release

Acropetal Technologies Ltd., receives the SEI CMMI-SVC Level 3 Certification

Bangalore, 3rd November 2011: Acropetal Technologies Ltd., a leading global Information Technology (IT) outsourcing service provider listed in NSE & BSE proudly announces the achievement of Capability Maturity Model Integration (CMMi) Level 3 for Services Version 1.3 certification.

This is a glowing endorsement of Acropetal's ability to provide high quality IT solutions through robust software engineering processes. It also underscores Acropetal's commitment to deliver excellence, process maturity and service quality ensuring timely and best-in-class solutions for its clients globally.

Acropetal Technologies is among the few companies globally to have been appraised for version 1.3 of the CMMi for Service maturity model.

The appraisal was conducted by SEI-Partner **Quality Waves Global Solutions Inc.**

With the CMMI Level 3 for Services certification, Acropetal provides the following benefits to its customers:

- High quality of service through rigid international processes and standards
- Lower costs due to a productive and efficient process
- Established rules and procedures that encourages better communication with customers
- Organized documentation to showcase visibility of the service life cycle

Commenting on this achievement, **Mr. Ravi Kumar, Chairman and Managing Director of Acropetal Technologies Ltd.,** said, "We are extremely proud to have achieved this distinction and believe it is a significant milestone in our ongoing journey towards excellence in execution. CMMi ensures a stronger correlation between client's business objectives to delivery goals and we believe this significantly improves the benefits, our clients will realize from our quality practices."

Developed by Software Engineering Institute (SEI) of Carnegie Mellon University, USA, CMMI Maturity Level 3 is the process maturity that independently verifies an organization's capabilities to continuously enhance its processes through incremental and innovative process and technological improvements. Version 1.3 of CMMi standard, which was released recently, provides a higher level of focus on aligning software engineering processes and improvement plans to project and client goals.
